

Awaiting, the speed of global changes and future of the world

The world is undergoing great changes, experiencing fast-paced events in such a way that the manipulation of global ideas is out of predictions of Superpowers. The incidents such as the «Al-Aqsa Storm») have challenged rapidly the sleeping conscience of the world by awakening them from their political slumber, making the arrogant Imperial politicians confused and bewildered.

The heroic resistance of Gaza, as a global enlightening media like the staff of Moses, has swallowed the magic of the imperial media's sorcerers, breathing the spirit of anti-tyranny and justice in the souls and has put a permanent shame on the foreheads of the Zionists and their western supporters. In such a situation, the culture and thought of Awaiting, as a historical and timeless phenomenon, can play a very effective role, fueling the fire of anti-tyranny and Anti-justice to pave the way for a global revolution.

The origin of fundamental changes on a global scale is moving from accepting oppression into anti-oppression. In the current situation, in the light of the «Al-Aqsa Storm») and by good management of the Resistance Front, this auspicious move has taken place, creating a new power in the region and the world. The operation of the «True Promise») is one the fruits of this

movement. It is very important to focus on an ideology that boost this movement and accelerate it. The rising culture of Expectation is the «only way») we must take it.

The Secretariat of the International Conference of the Doctrine of Mahdaviyat, as previous annual conferences, organizes the 20th conference with the title of «Awaiting, the speed of global changes and the future of the world»). All scholars and thinkers are invited to send their articles in the following themes to the conference secretariat.

Axes:

A) Vanguard

- Islamic revolution of Iran
